VII.—LAND SETTLEMENT.

No. 28.—Land Settlement as on the 30th June, 1926.

Particulars.										Area.	Area.
I.—ABSOLUTELY ALIENATED:										acres.	acres.
Area sold by public auction or other forms of direct sale or otherwise alienated up to 30th June, 1926	11,688,569
II.—IN PROCESS OF ALIENATION ON THE 30TH JUNE, 1926:									
Midland Railway Concessions in process of alienation										54,800	54,800
Free Homestead Farms										922,761	922,761
Conditional Purchases										7,611,664	7,611,664
Selections from late W.A. Land Company										2,143	2,143
Selections under the Agricultural Lands Purchase Act										537,055	537,055
Special Occupation Leases and Licenses										722	722
Homestead or Grazing Leases										9,419,745	9,419,745
Poisson Land Leases and Licenses										40,004	40,004
Village Allotments										4	4
										18,589,100	18,589,100
Total area alienated or in process of alienation on the 30th June, 1926										...	30,277,669
III.—LEASES OR LICENSES IN FORCE ON 30TH JUNE, 1926:									
Issued by Lands Department—									
Pastoral Leases										226,610,576	226,610,576
Special Leases										41,963	41,963
Leases of Reserves										2,130,050	2,130,050
Residential Lots										7,410	7,410
Issued by Mines Department—									
Gold Mining Leases*										6,506	6,506
Mineral Leases†										43,199	43,199
Miners' Homestead Leases										32,575	32,575
Issued by Forestry Department—									
Timber Leases and Concessions										428,318	428,318
Timber Permits										a1,260,170	a1,260,170
										230,562,767	230,562,767
IV.—AREA NEITHER ALIENATED, IN PROCESS OF ALIENATION, NOR LEASED										...	363,748,364
Total Area of Western Australia	624,588,800

* Inclusive of 24 acres on "Private Property." † Inclusive of 323 acres on "Private Property."
a Including 38,467 acres of Firewood Permits, but exclusive of Miscellaneous Permits for Forest Produce, area 4,521,240 acres, also two other Permits, area 3,803 square miles.

No. 29.—Principal Crown Lands Transactions.—Area of Crown Lands for which Applications have been approved by the Lands Department from 1916.

XV.—METEOROLOGICAL STATISTICS.

No. 42.—Notes on the Rainfall of Western Australia for July, August, and September, 1926.

July.—This month of 1926 must take a place amongst the wettest individual months ever experienced in the South-West Coastal and Agricultural Districts of the State. An absolute record for all months was established at Chidlow's Well, Mundaring, Collie, and Donnybrook, at York and Cunderdin, and at five other stations in the Great Southern country. In addition, several other localities in the South-West Coastal, Eastern and Great Southern Districts established records for the month of July. In previous years the following months were conspicuous, and, in the great majority of cases, were responsible where the fall for July, 1926, was exceeded:—August, 1900; July, 1907, 1912, and 1917; June, 1917; May, 1921, and June, 1923. Amongst the few stations with rainfall records extending back so far, July, 1878, stood out as a very wet month.

The most pronounced excess above previous record values occurred in the central parts of the Great Southern region—that is to say, near the head waters of the Avon, Murray, and Collie Rivers, in all of which more or less serious floods were experienced. The Preston, which rises to the south-westward of Bunbury, was also flooded. Donnybrook is located in the basin of this river, and also Greenbushes and Bridgetown, where record rainfall for July was noted.

The heaviest inland falls took place on the 9th and 10th, and between the 18th and 22nd, the latter being responsible for the most serious floods. Showers, however, were practically continuous, few stations in the South-West quarter of the State experiencing less than 17 wet days in the course of the month.

The heaviest total for the month was recorded at Jarrahdale (17.76 inches, or 9.21 above normal), but Chidlow's Well, with a total of 16.98 inches, exceeded the month's average by the greatest amount (9.75 inches). In Perth the total of 12.28 inches exceeded the average by 5.45 inches, and was the heaviest July fall on record, and, with the exception of June, 1923, when 12.80 inches was measured, the heaviest recorded in any single month since the inception of official rainfall records in 1876. Some years earlier, however, a private rain-gauge which, so far as can be judged, was correctly installed, yielded even higher results.

Turning to other parts of the State an entirely different state of affairs was revealed. Some of the heaviest rains reached the Gascoyne and Goldfields, and averages were slightly exceeded in the Southern Murchison and Yilgarn areas, also in the Esperance district. The two last-named regions received sufficient rain to maintain the growth of the wheat crops, and, no doubt, pastures benefited somewhat, and water supplies slightly, in other sub-tropical areas. In the tropics only two stations reported any rain at all, and that of the lightest character.

August.—The early days of the month showed a decided slackening off in the vigour of the rainstorms compared with the previous month. Registrations were effected fairly generally on the opening day, extending to the greater part of the Coolgardie Fields, as well as throughout the agricultural country. Subsequently, however, the disturbances were of slight intensity for over a week, although a few light showers reached parts of the wheat belt between the 5th and 7th.

From the 11th to 15th more general falls occurred, extending inland, in a light fashion, to the Yilgarn district. Another week of minor showers ensued, and then a third general rainfall on the 22nd brought fair to moderate registrations as far eastward as Southern Cross.

An interval of fine, frosty weather preceded the next disturbance, which developed on the 27th and proved to be the most widespread of the month, and the only one to bring showers of any importance to the Southern Murchison country. It concluded with heavy southerly blows, driving the rain inland over the South Coast—a feature emphasised by the fact that the most notable excesses above the August average were indicated at Esperance (1.97 inches) and Norseman (0.85 inches). Here and there in the Southern Midland and Eastern agricultural districts, and in the Metropolitan neighbourhood, smaller excesses were recorded, but in general the total gaugings for the month showed more or less pronounced defects, which exceeded an inch at the majority of Great Southern stations.

On the North Coolgardie and North Murchison Fields, and the northern parts of the Gascoyne, the rainfall was insignificant, while the only reported registration in the tropics was one of 0.04 inches at Bamboo Creek on the 25th, when a light thunderstorm passed over the station.

September.—The month opened with a general agricultural rainfall. The gaugings dwindled rapidly from over an inch on the coastal ranges (Mundaring 2.20 inches) to a minimum of 0.20 inches in the extreme eastern wheat areas, where the results left something to be desired. Nevertheless, the falls were useful and timely, especially in view of the light character of the August rainfall. The next three weeks saw a recurrence of the almost yearly anxiety regarding the late rains, for the disturbances fell off in vigour and, although showers were fairly frequent on the coast, they failed to penetrate inland except in the lightest fashion. The 22nd, however, brought relief. A storm centre had been traced from St. Paul Island to our shores during the preceding week, and its development fulfilled the highest expectations. All wheat areas, including the Yilgarn and Norseman-Esperance country, registered excellent falls, and light showers also reached parts of the Gascoyne and Northern Fields. A repetition of the visitation on the 27th concluded the month's rain so far as inland districts were concerned, but showers persisted on the coast, and on the closing day another general disturbance was brewing.

Reviewing the aggregate falls, it was found that the average was exceeded from Gingin southward and inland to Kellerberrin, but further northward and eastward defects were the rule. The heaviest excesses were noted at Mundaring and Donnybrook, where the month's total exceeded seven inches. In the tropics the month was rainless, but it was interesting to note that monsoonal rains had commenced in the Northern Territory.
